TRUE WIRELESS FREEDOM. NO STRINGS ATTACHED.

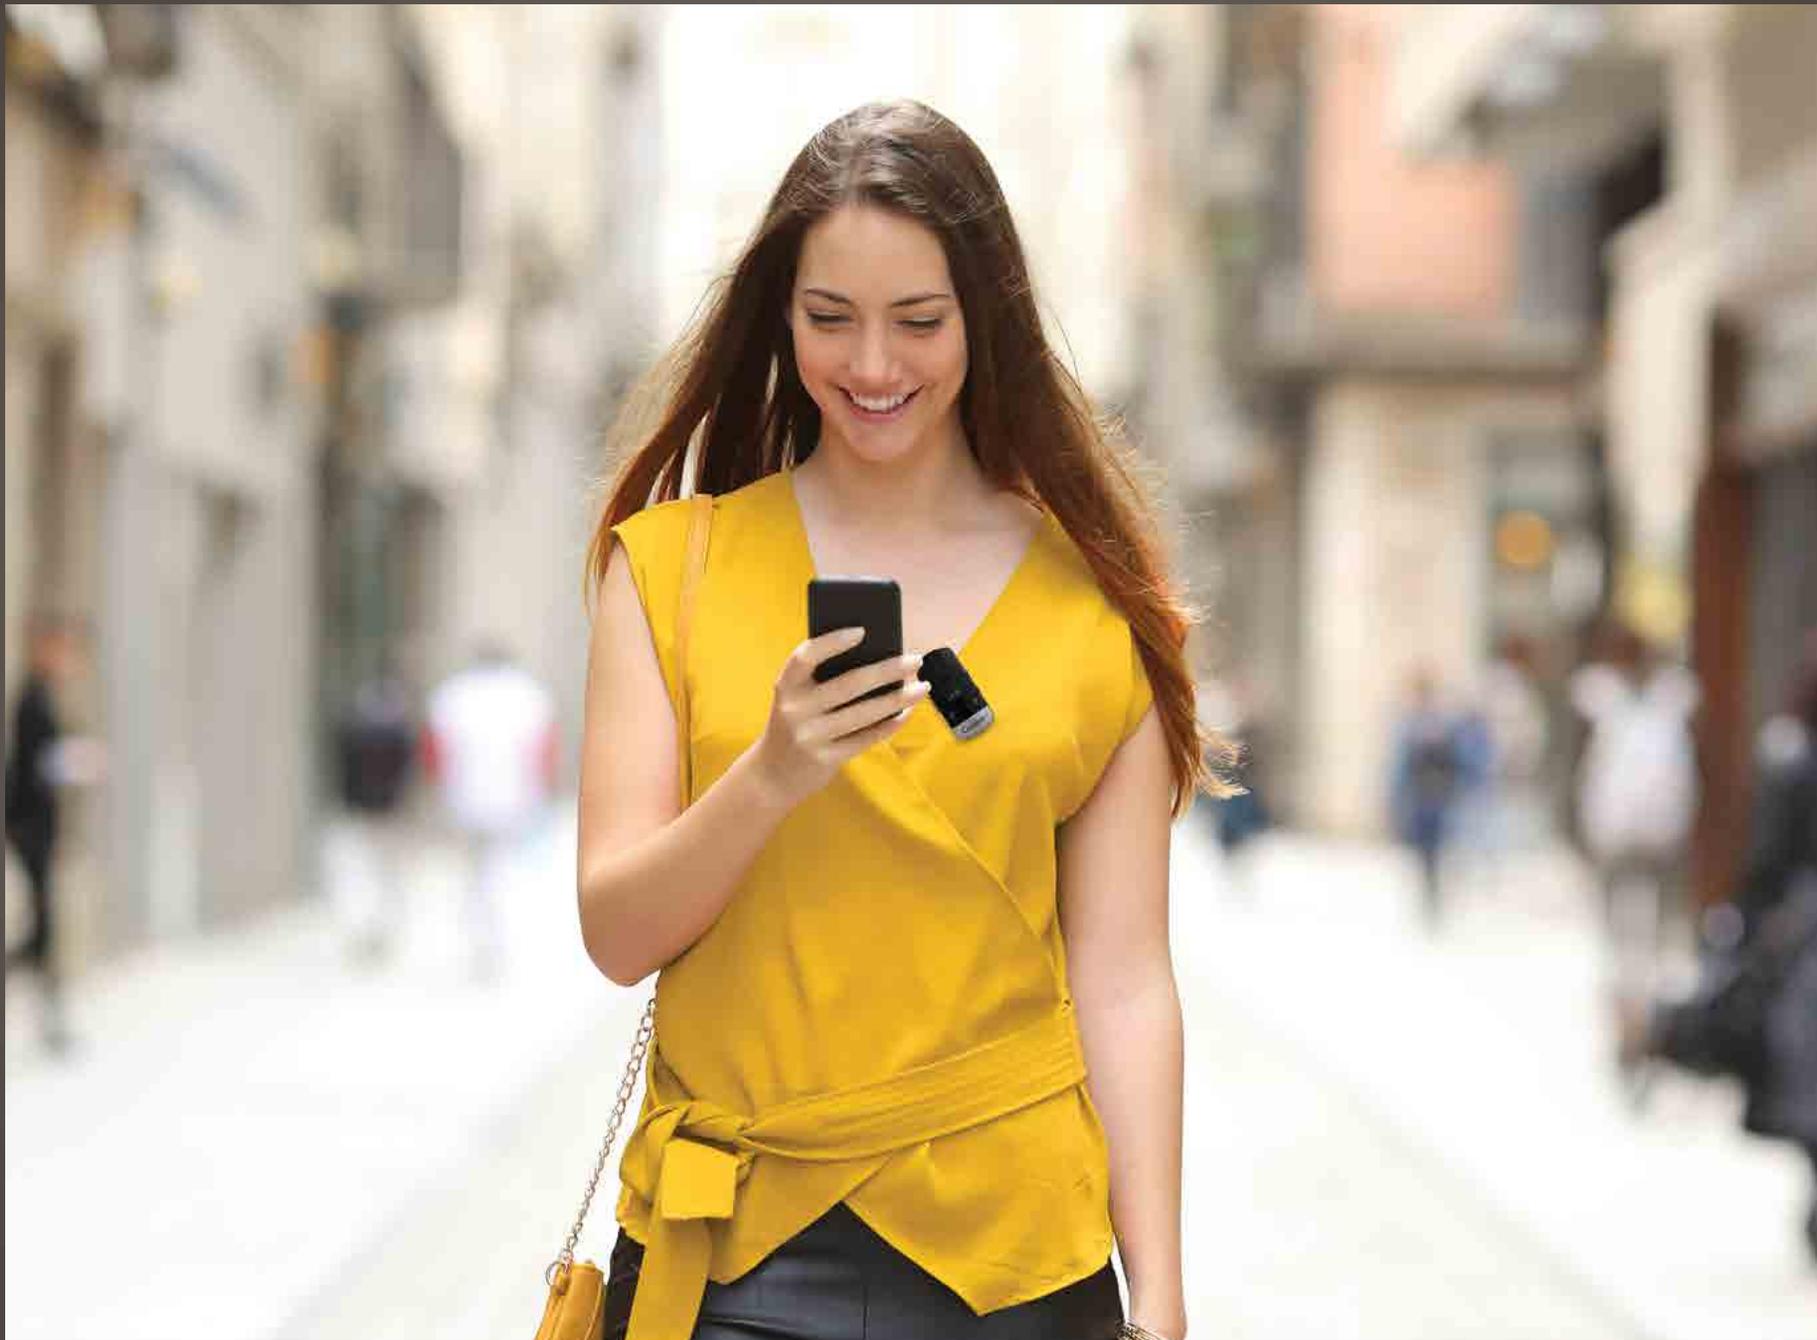

Forget the wires and bulky, neck-worn components that less advanced systems require. Cochlear™ True Wireless Accessories give you the freedom to go anywhere with a true, wireless experience. Pair any one of our Cochlear Wireless Accessories with your sound processor for hassle-free solutions that free you (*and your hands*) to focus less on hearing and more on what's important: life.

Wireless freedom. Connected dependability.

Cochlear Wireless Accessories utilize the same 2.4 GHz wireless protocol that Bluetooth® and Wi-Fi devices depend on. It's a robust, time-tested, dependable technology that sets the standard for wireless connectivity. That means a clear, secure connection without the interference and signal drops you might experience with other wireless systems.

Easy to pair. Easier to use.

Simply press the pairing button and power up your sound processor. Within seconds, you're connected. That's it. Once paired, you can easily turn your accessories on and off with the push of a button. Should your connection break—if you step outside the device's maximum range, for example—you'll automatically be reconnected when back in range.

Phone Clip

DISCONNECT. THEN CONNECT.

Bluetooth® enabled wireless gives you control over your smartphone device. The Phone Clip gives you a hands-free connection to friends and family using your smartphone. Make calls and carry on conversations without having to take your phone out of your pocket. With Bluetooth technology, place and receive calls and adjust volume at the touch of a button.

Hands-free streaming directly from the phone to you.

In the car or on the go, the Phone Clip keeps you in contact with the people who matter most. Leave your phone in your pocket or bag and enjoy the convenience and safety of hands-free calling. It's small and lightweight, so you can clip it to your clothing and take it wherever you go. With the Phone Clip, you can take full advantage of your smartphone's voice control functionality. Use it to compose and send text messages, dial calls, get directions, and more.

Hear what matters. Cut what doesn't.

If you have trouble hearing on the phone due to background noise, you'll love the Phone Clip. You are able to block out surrounding noise so you—and the person you're talking to—can enjoy comfortable conversations even in noisy places.

True Bluetooth control.

Directly connect to an incredibly wide range of wireless devices. You'll use Bluetooth® enabled music players without any wires, ear buds or additional accessories hanging around your neck.

Features:

- 6 hours of talk time and 80 hours of standby time
- Call reject and transfer, last number dialed and voice dial functions
- A mute button to block out surrounding sounds*
- Simultaneous connection to two Bluetooth devices (*such as your smartphone and tablet*)
- Quality stereo sound when streaming music
- Private and secure connection

* Available in the Baha® 4 and Baha 5 Sound Processors only

Mini Microphone 2

Mini Microphone 2+

HEAR NO MATTER WHERE YOU GO.

We provide you with a choice of two Mini Microphones that give you the freedom to hear more clearly no matter where you are. From lecture halls to one-on-one conversations, use either of the portable wireless clip-on microphones to transmit speech and sound directly to your sound processor. You can easily clip it on your companion's collar when you are dining at a restaurant, or give it to your child's teacher during lesson time.

MINI MICROPHONE 2

Clearer speech delivered straight to your sound processor.

Carry on conversations more easily in even the noisiest environments. Simply clip the Mini Microphone 2 to your companion to help you hear conversations - no matter what's going on around you. The Mini Microphone 2 is ideal for helping you hear one-on-one conversations better, especially in noisy situations, like a busy restaurant.

Features:

- Range of over 80 feet with clear line of sight
- 10 hours of talk time on a single battery charge
- Recharges in 3 hours with included charger
- Private and secure connection
- Activated at the push of a button or by remote control
- Plug-and-play streaming capabilities
- Reconnects automatically when signal is broken

MINI MICROPHONE 2+ *Expanded Connectivity and Flexibility*

Hear better in groups and enjoy plug-and-play streaming.

The Mini Microphone 2+ provides you with the ability to hear better¹ in groups, including at school, at the office and at home. The Mini Microphone 2+ includes a built-in telecoil and is compatible with FM Systems. It also includes a line-in jack so you can enjoy more than just speech. Plug it in to any other sound device—an MP3 player, computer, or more—to use it to listen to your favorite songs, watch videos on your computer or talk with friends using online telephone services.

Features of the Mini Microphone 2+:

- Omni-directional microphone for use in large groups
- 11 hours of talk time on a single battery charge
- FM connectivity
- Built-in telecoil
- Ability to connect with other personal electronics via plug-in
- Pairing button status indicators
- Low battery light indicator

EXPAND YOUR TV EXPERIENCE.

Hear stereo sound directly from your TV. With the TV Streamer, you don't have to choose between your favorite TV show and taking part in conversation. You get a balanced experience, with sound from the TV streamed directly to your sound processor while you're still switched on to what's going on around you.

Don't disturb others while watching your favorite show.

Turning up the TV may help you hear it, but it can be too loud for those around you. Just like wireless headphones, the TV Streamer lets you enjoy your favorite shows without overpowering your friends and family.

Tune in without tuning out.

The TV Streamer allows you to hear sound from the sound processor and the TV without needing to prioritize one over the other. That means you're free to watch your favorite TV shows and discuss them with friends as you watch. Traditional, less advanced hearing devices demand that you choose either-or. The TV Streamer doesn't.

Easy connection and automatic reconnection.

The robust wireless connection is easy to set up, and if you leave its 23-foot range for less than five minutes, it will automatically reconnect when you're back in range without you needing to do anything. With the long range, you'll hear the TV as you move around. No need to sit in a certain spot as with other loop systems.

Features:

- Streams stereo sound directly to your sound processor
- Range of up to 23 feet
- Set so you can hear both audio devices and sounds around you
- Pair with as many sound processors as desired
- Install and forget it—always stays paired

Hear now. And always

As the global leader in implantable hearing solutions, Cochlear is dedicated to bringing the gift of sound to people with moderate to profound hearing loss. We have helped over 450,000 people of all ages live full and active lives by reconnecting them with family, friends and community.

We aim to give our recipients the best lifelong hearing experience and access to innovative future technologies. For our professional partners, we offer the industry's largest clinical, research and support networks.

That's why more people choose Cochlear than any other hearing implant company.

1. Wolfe J, Morais Duke M, Schafer E. Improving hearing performance in Cochlear™ Nucleus® 6 users with True Wireless Accessories. Denver: Cochlear Americas; 2015.

You should talk to your physician to see if you are a candidate for cochlear implantation, hybrid implantation, or a Cochlear Baha System, and to understand the associated risks and benefits, and CDC recommendations for vaccination. Implantation with a hybrid Implant, cochlear implant or Baha System is a surgical procedure, and carries with it the risks typical for surgery, and outcomes cannot be guaranteed.
